

Chaejeong Hyun

Tel: (+82) 10-2652-7370

[Email](#), [Github](#), [LinkedIn](#), [Google Scholar](#)

My current research interests are efficient retrieval in RAG, Graph RAG, scalable and effective operations in agentic LLMs.

Education

Korea Advanced Institute of Science and Technology /

MSc., School of Computing @[InfoLab](#)

MARCH 2026 - PRESENT, DAEJEON, KOREA

Korea Advanced Institute of Science and Technology /

BSc., School of Computing & AI Special Designated Major

(AI특별지정전공)

AUGUST 2021 - FEBRUARY 2026, DAEJEON, KOREA

Publications

GraphContainer: A Unified Platform for Comparing and Debugging Graph RAG Methods

Seonho An*, Chaejeong Hyun*, Min-Soo Kim (co-first-author)

VLDB 2026 accepted

GraFine: Retrieval-Time Refinement for Efficient Graph RAG over Corpus Graphs

Seonho An*, Chaejeong Hyun*, Min-Soo Kim (co-first-author)

CIKM 2026 accepted

A MetaFQ method to Enhance Decision Making in Large Language Models

Chaejeong Hyun, Seonho An, Min-Soo Kim

KCC 2025

Experience

InfoLab KAIST / Undergraduate Research

FEBRUARY 2025 - JUNE 2025, DAEJEON, KOREA

- Researched about RAG systems

DevStack / MLOps Engineer

AUGUST 2024 - FEBRUARY 2025, SEOUL, KOREA

- Developed root-cause-analysis (RCA) solution for K8s and Openstack services using RAG-based LLMs and knowledge graphs
- Designed and implemented an optimized edge-computing MLOps

system for inter-cluster ML pipelines

MadCamp: Intensive Programming and Startup, KAIST

DECEMBER 2023 - JANUARY 2024, DAEJEON, KOREA

- Created 4 end-to-end services, from ideation to service deployment, in a 5 week intensive program
- Developed Android applications and a Next.js based metaverse project

TainAI / Backend Developer

JUNE 2023 - AUGUST 2023, SEOUL, KOREA

- Contributed to initial backend database setup for a new e-commerce promotion application
- Developed backend services such as member authorization, invitation, subscription and payment services

Awards and Honors

Lim Mi-Sook Scholarship, KAIST

AUGUST 2025 - DECEMBER 2025

2024 Service Hackathon / Excellence Award (ELICE)

FEBRUARY 2024

- Participated as a full-stack developer to create an iOS application on the issue of illegal parking in Daejeon
